

Gyeorye(Gary) Lee / 이겨레

Seoul, Korea | 010-2597-0168 | gyeorye.lee@outlook.com

PROFILE

- Over 10 years of experience in project management, quality management and product launch in the software industry.
- Proven leader who leads team members well by continuously aligning the direction of the entire organization with the team.
- Team player who creates a concise and practical process and continuously pursues best practices as the organization grows.
- Decision maker that derives the best results based on quantitative indicators that can know scope, schedule, and resources.
- Thoughtful servant leader with an agile mindset, acting as a bridge between business units, product management and engineering.

EXPERIENCE

Sendbird, Seoul, KR

Jan. 2022 - Present

Lead, Technical Program Manager

- Managed three direct reports, shared the vision of the team, and showed what the goals of project management are in Sendbird.
- By creating a script that engineers can use easily, the accuracy of sprint velocity tracking for all engineering teams has been improved by 20%.
- Reduced the communication cost and enhanced the alignment in engineering organization by creating a single source view where anyone can easily check what the current project is, what is the progress, and what is the priority.
- Led the quarterly planning program. The entire engineering organization and product management department discussed the items to be worked on every quarter, and decided to take into account dependency, scope, resources, schedule, and priority between teams.

Sendbird, Seoul, KR

Feb. 2020 - Jan. 2022

Technical Program Manager

- Coordinated and tracked the project work of 4 cross-functional scrum teams, involving the development of realtime chat/messaging services.
- Optimized the process of setting up new dedicated cloud resources for new customers and reduced lead times from 15 business days to 10 business days, resulting in successful delivery of new cloud resources to a total of 10 customers.
- Set up the Jira projects and advanced roadmap with new workflows, fields, screens, automations, and Groovy scripts.
- Facilitated a daily stand-up, sprint planning, review, and retrospective. Also, checked the burn down chart and the team velocity to track the sprint progress.
- Helped the team understand and apply agile culture and Scrum framework as a Scrum Master.
- Based on the story points and job categories of each scrum, quantified the expected future resources, and obtained a 50% higher head count from the board of directors to the engineering team than before.
- Created a collaborative process and educated each scrum, the communication cost incurred in the collaborative process was reduced, and the visibility was increased.

LG Electronics, Seoul, KR

Mar. 2018 - Feb. 2020

Software Program Manager

- Successfully released webOS Open Source Edition(OSE) 2.0 and other occasional releases to github.com/webosose 11 times total.
- Managed the Product Backlog Items(PBI) according to the internal rank calculator which considers the stakeholders, size of scope, urgency and other factors.
- Dismissed unclarified risks through reviewing the work scope and changing the resource allocations. Also, resolved issues according to the severity and priority to not block the scrums.
- Refined the requirements with domestic and overseas scrums. To meet the project's goal and schedule, participated in the Sprint Review and Retrospective.

3D Systems, Wilsonville, OR

Oct. 2016 - Feb. 2018

Senior Software Quality Engineer

- Generated automated API testing for JSON format internal protocol, and attached it to the Continuous Integration system to check the regression of the daily builds.
- Applied a linear regression algorithm written in Python to calculate a build time estimation equation. Massively decreased human efforts for reading and analyzing 20 printers' log files, and calculating experimental data.

3D Systems, Seoul, KR

Oct. 2012 - Oct. 2016

Software QA Engineer

- Standardized System Level Test document which covers 3D Printer firmware and client software across the entire company using TestRail.
- Decreased human testing time by 50% with implementing C# based coded UI testing harness, and attaching it to Continuous Integration system.

SKILLS

- Effective verbal and written communications skills. Fluent in English and Korean.
- JIRA Cloud Admin, Confluence, AWS, Groovy, ScriptRunner, Jira Automation, Python.

EDUCATION

M.S. in Automotive Engineering, Hanyang University, Seoul, KR,

Sep. 2012

B.A in Mechanical Engineering, Hanyang University, Seoul, KR,

Feb. 2010

CERTIFICATE

Atlassian Certified in Managing Jira Projects for Cloud(ACP-620)

Feb. 2022 - May 2024

Certified Scrum Master – Scrum Alliance

Jun. 2019 - Jun. 2021
